## Project

### Ezora – A Mood-Based Personalized Tourist Guide App for Kozhikode

Size: 4 Members | Duration : Planned for Final year project (In Process)

*Tech Stack: Flutter, PHP, MySQL, Google Maps API, OpenWeather API*

- Developing a mood-sensitive travel app to recommend personalized tourist destinations in Kozhikode based on user-selected moods (e.g., calm, adventurous, foodie, explorer).
- Integrated with Google Maps to display location-based suggestions and OpenWeather API for real-time weather updates.
- Features a built-in review system and an SOS safety option to share live location with trusted contacts.
- Backend developed using PHP/MySQL to manage user preferences, place data, and reviews.
- Aims to enhance local tourism by providing a personalized, scalable, and safety-focused user experience.
